BEST PRACTICES

ACADEMIC AND ADMINISTRATIVE AUDIT

Objectives of the Practice

The objective of the Academic and Administrative Audit is to assess the performance of the university academic Departments/Offices/Cells and highlight their accomplishments and convey suggestions, if any, so that they can improve further in terms of the quality of their work domain i.e. teaching, research, administration, and maintenance of records along with curricular and extra-curricular activities. The visiting committee members for AAA are supposed to give their suggestions on the various points such as faculty and staff, infrastructural facilities, curricular development, research facilities and research output, teaching methods and use of ICT in academic process, feedback mechanism, faculty development programmes, SWOT analysis, mentoring system, generation of funds and their optimum utilization, evaluation methods adopted for internal and external examinations and Future plans of the department.

Context

The practice of Academic and Administrative Audit was started in order to address whether;

- 1) the arrangements for quality assurance are fit for purpose and conform to the institution's role and mission.
- 2) the standards of higher education align with the expectations.
- 3) the students have access to appropriate learning opportunities through taught provision, private study and supported learning.
- 4) the department are able to promote and enhance high quality teaching and learning.
- 5) the students are fully supported in their academic and personal development to their highest possible levels.
- 6) the planning, resource allocation and quality management is in line with vision and mission of the University.
- 7) the implementation of various policies has been done.
- 8) the academic calendar of the University is adhered with in terms of timelines.
- 9) the offices and other cells are keeping the records and readily retrievable preferably in hard/soft form or through Enterprise Resource portal (ERP).
- 10) the file movement in various (academic departments and administrative offices) is taking place in timely manner

The Practice

(a) Methodology:

The academic departments administrative offices/cells are expected to submit the necessary information in the format provided by the IQAC of the university. The format is prepared in such a way that it includes all the possible information as required by criteria of NAAC. For example, The required information includes the achievements,

curricular, co-curricular activities and extra-curricular activities carried out, participation of students in various activities and their achievements and participation of teachers in national and international conferences, seminars and workshops. The funds generated by the faculty and the department, the purpose and the names of the funding agencies and duration of the project. It also includes individual faculty profile indicating their contribution in teaching, research and extension activities and their achievements, awards and prizes received. It is advised to all the departments that supporting data regarding all the claims made by the department and individuals should also be kept ready in the departments. The departments are advised to keep all the data such as Feedback forms collected from students and other stakeholders on curricular developments, infrastructural facilities and performance of teachers for validation of the committee. Further, the information about consultancy services, collaborations with other reputed universities and institutions, placement records, students admitted and their results in final examinations, mentoring system and financial support provided to students etc. should also be readily available during the visit of AAA committee visit.

Visit of AAA Expert Team:

The AAA committee visits the academic and administrative units of the university as per the visit schedule. The detailed visit schedule is informed well in time to all the departments and administrative sections. During the visit to the departments Chairpersons and Head of Sections have the choice to make a brief presentation about the department on all aspects to the AAA committee and/or provide them the details as per format of information already provided to departments. The committee may interact with teaching and non-teaching staff and may observe the infrastructural and academic/research facilities available in the department. The faculty members usually interact individually with the committee and brief them about the innovative methods adopted in teaching and research and efforts taken for improving the quality. The faculty can also impress up on how their department is different than similar departments in other universities. The committee may also interact with the students to have suggestions from them regarding infrastructural facilities available, performance of teachers, evaluation methods adopted and teaching learning process. Although University has a separate feedback mechanism from students for classroom teaching learning process during mid of each semester.

It is expected that all the departments, administrative offices and cells submit the information in the format for providing Departmental information and for **Faculty Profile** enclosed here with to IQAC office before in the month of July of each year so that the visit of AAA committee could be arranged in the month of August/September.

Evidence of Success

The academic audit of the teachers of various departments of the university is in practice since the year 2016. Academic audit is done after the end of every semester by a committee duly approved by the Vice Chancellor and consists of the Chairperson of the department and at least one senior faculty member of another department of the university as an external expert. At the time of start of this practice, it was observed that the faculty members were publishing the papers in poor quality journals. In fact the research paper publications especially the numbers of research papers in Scopus, SCI and Web of Science journals were not significant. As a result of this audit, faculty

members were encouraged to contribute in this regard and numbers increased year by year since then. Teachers were also encouraged to use ICT tools for conducting their classes.

A fully indigenous online ERP portal was also created at the university level for better record keeping in terms of individual faculty members' activities/achievements and the departmental activities as well.

In the year 2018-19, audit was carried out for the administrative offices also along with the academic audit. The committee for this audit consisted of External experts and senior faculty members of the university. On the basis of observations made by the committee, suggestions were conveyed to the respective office heads who responded the same by taking appropriate actions thus improving the working of their respective offices. The ATRs were submitted to IQAC later on and were placed and approved in EC.

Problems Encountered and Resources Required

One of the many problems faced during the conduct of the academic and administrative audit was the compilation of data due to its timely unavailability to the IQAC office. It was also felt by the committee that even various activities are being done in the academic departments and administrative offices but they are not being recorded as per the guideline of the various accreditation bodies whether it is NAAC or NBA. For regular and smooth conduct of AAA in the university, timely updation of activities conducted in various departments and offices is also needed on the ERP portal.

The University has a number of academic departments and administrative offices so all the academic departments could not be covered during the AAA in the year 2019. It was difficult to take time from the outside experts and schedule the visit. Sometimes even after scheduling the time the committee members were not available.

Some of the departments were not quite prepared for getting the audit conducted and wanted more time for the same. Many departments/cell took more time to take actions towards the suggestions/observations made by the committee which delayed the compilations. For year 2019-20, the process of conduct of academic and administrative audit was delayed due to spread of COVID-19 pandemic.

360 DEGREE FEEDBACK

360° Feedback: Continuous Improvement through Stakeholders' Perspective

Objectives

1. To adjust and improve current and future actions and behaviors.
2. Helps understand learning objectives, choose the best strategies for the task, and make course corrections throughout the learning process.
3. To improve the performance of staff and students and increase their future potential and value to the university.

The Context

1. The questionnaire

The design of the questionnaire shall be such that the questions are not long and also they incorporate the intent precisely with which it is designed.

2. Getting feedback

People don't like 'wasting' their time sharing their feedback.

3. **Getting right feedback**

Filling feedback forms have always been boring.

The Practice

Regulatory bodies have mandate to set norms and standards for regulating the quality of educational institutes. Bodies like UGC and NAAC have policies and procedures to orient India's Education system to quality. Stakeholders need to orient their mindset to quality and then only we can dream of a system – that satisfies all.

Quality vs. Quantity has always been a thought provoking issue. As key stakeholder, students are concerned about the expected outcomes. Since the technical education scenario is drifting from output based system to outcome based system, quality in such processes needs to be addressed. It needs to be ensured that the outcome parameters vis a vis the objectives are mapped and the programmes are in tune with the national policies with reference to the global trend.

Satisfaction of stakeholders including students, faculty, alumni and societal expectations has always been a challenge. Since Quality is a benchmark on road to success and thus the improvement scope is bound to be there in any system.

Some of the best practices at J.C. Bose University of Science and Technology, YMCA include Academic Audit, 360 degree feedback, one semester mandatory Industrial training for students and transparent exam system among others.

360-degree feedback, also known as **multi-rater feedback**, **multi source feedback**, or **multi source assessment**, is a process utilized by this university to solicit information from a variety of sources on different aspects. Most often, information solicited in a 360-degree feedback process includes feedback from all the stakeholders of the University. Such feedback can also include, when relevant, feedback from external sources who interact with the University, such as peer group, examiners, alumni etc. 360-degree feedback is so named because it solicits feedback regarding University from a variety of points of view (Students, Alumni, Peers, Industry Experts and Parents).

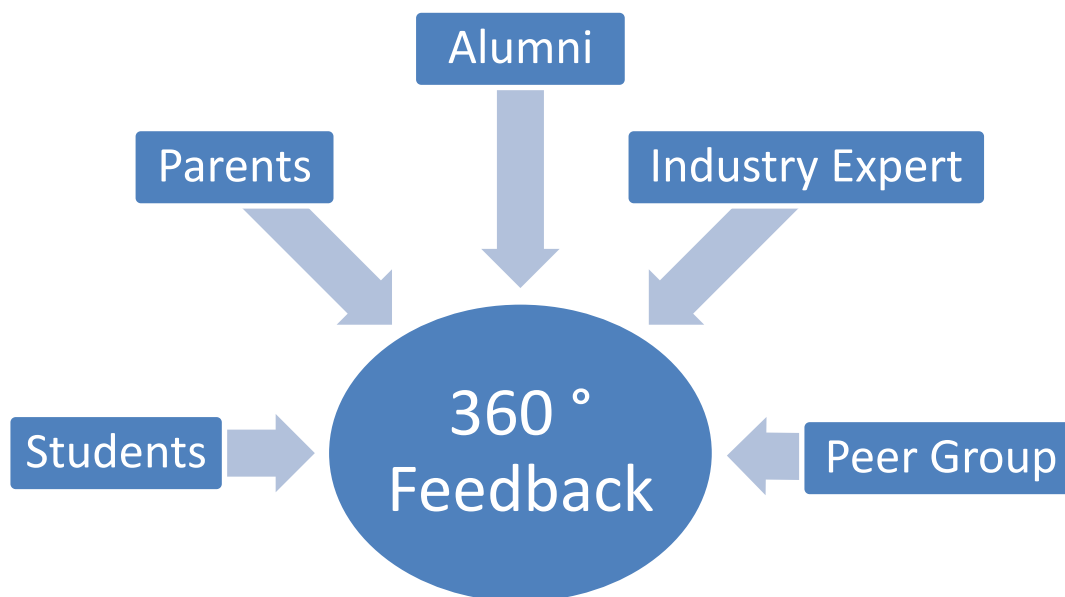

Fig 1: Stakeholders of University for 360° Feedback

The following table depicts the mechanism for feedback collection from various stakeholders

S. No.	Stakeholder	Mechanism of Feedback
1	Student	Students are required to fill-up Feedback Form during semester whereby they are required to give their feedback on relevance, adequacy and coverage of curricula of each subject along with the performance of teacher in the class, teaching methodology and teaching pedagogy etc. Such feedback is taken by the Department based upon which remedial action is taken as when required.
2	Alumni	Meetings of Alumni are held at least once in a year under the aegis of Alumni Association. Alumni also visit the campus of the University on various occasions and events. Feedback of Alumni is taken in structured feedback form, which includes feedback of relevance and adequacy of curricula, specifically, vis-à-vis their capability to adapt to the world of work after having studied in the Institution.
3	Employers	Feedback on curricula and performance of Alumni is taken from the employers not only when they visit the campus for conducting campus interviews but also involving them during the curricula finalization.
4	Parents	Feedback of parents is taken in a structured feedback form as and when they visit on various occasions and events.
5	Peer Group	External Academic Experts are normally called for delivering Expert Lectures, Selection of Teachers, Workshops, Conferences, Symposia, Faculty

		Development Programmes, examiners etc., whose feedback on institutional aspects is taken in addition to the relevance and adequacy of infrastructure facilities specifically labs, workshops, library and central computing facilities etc.
--	--	---

In our University, 360° feedback is collected from all the stakeholders by using online or offline mechanisms. Online mechanism for collection of feedback uses online forms for which links are sent to the stakeholders while offline mechanism uses a set Performa to be filled by the stakeholders.

After collecting data from the stakeholders, the response sheet are being generated at department level and analysed thereof by using predefined parameters. Based upon the report, the departments take appropriate action. The department submits a copy of the report along with the action taken to the Internal Quality Assurance Cell (IQAC).

The feedback process is depicted in Fig. 2.

The stakeholders of our University include Students, Parents, Alumni, Industry Experts and Peer Groups. For the purpose of understanding, here only Student feedback is being discussed.

Student Feedback collection activity is conducted by the respective departments in two ways:

- a) Classroom Feedback (conducted in every semester)
- b) Exit survey (conducted once in the final semester)

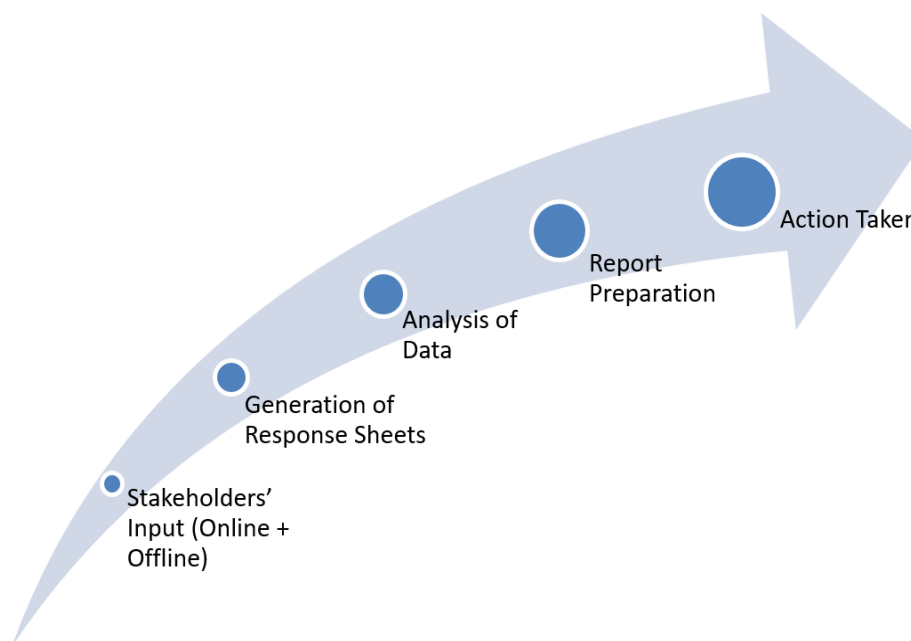

Fig 2: 360 ° Feedback Process

The stakeholders of our University include Students, Parents, Alumni, Industry Experts and Peer Groups. For the purpose of understanding, here only Student feedback is being discussed.

Student Feedback collection activity is conducted by the respective departments in two ways:

a) Classroom Feedback (conducted in every semester)

b) Exit survey (conducted once in the final semester)

The predefined parameters for classroom feedback are Subject Matter, Teaching Learning Process, Use of Learning Resources, Evaluation Process and General Points and the question related to each key parameter are given below:

Subject Matter

- Was the course planned?
- Was the course coverage adequate?
- Did the topic provide new knowledge?

Teaching Learning Process

- Were you able to understand the contents in class?
- Was the interaction in class adequate?
- Were you satisfied with teaching methodology?

Use of Learning Resources

- Was the board used effectively?
- Were the projection aids employed effectively?
- Did the overall use of learning resources enhance your understanding?

Evaluation Process

- Were adequate assignments/tutorial sheet given?
- Were the assignment and class test challenging?
- Were the same checked properly within seven working days?
- Was the evaluation fair and cleared your doubts?

General Points

- Did the teacher meet your expectations?
- Were you satisfied with the course in general?
- Would you like to take another course from the same teacher?

These questions are designed in such a manner that they precisely cover almost all the key parameters.

The responses of the students are collected and analysed at the Department level. The sample screenshots of the responses and their analysis are shown below in Fig. 3 and Fig. 4:

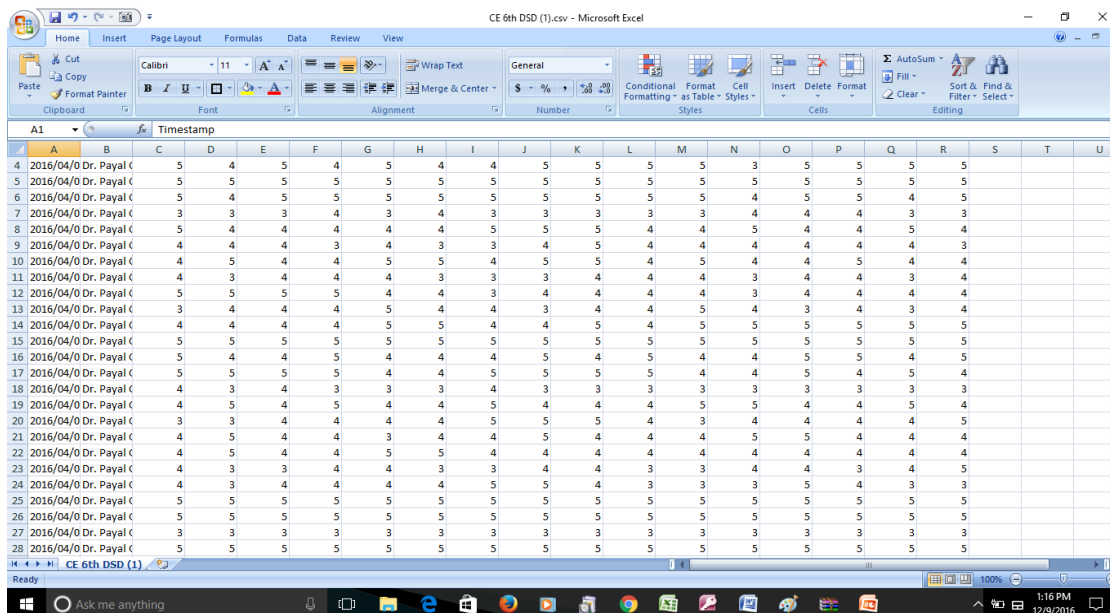

Fig. 3: Sample Responses

Fig. 4: Sample Analysis

The prime aim of 360° feedback is to ensure that every student has access to competent and qualitative teaching which leads to vibrant academic, social and personal growth. The IQAC regularly monitors the activity along with other quality initiatives. We need to continuously incorporate such Quality Initiatives in our systems and follow them in letter and spirit for satisfaction of stakeholders.

Evidence of Success

Feedbacks always pave a way for continuous improvement. The feedback system has helped in many ways, some of the actions include:

1. Introduction of Credit based system
2. Latest Technologies and practices as elective subjects

3. CBCS
4. Grievance Portal
5. Better Sanitation facilities
6. Improved labs and infrastructure

Problems Encountered and Resources Required

1. It was tough to visualize the hard copy of the feedback forms received from various stakeholders.

To overcome this we used online google forms for data collection and generated analysis report.

2. Reporting and Action taken

By the end of every semester/ academic year, the departments are advised to submit an analysis report along with an action taken report for the same. In case any action is required at the university level, then the Chairperson submits a report for the same to the IQAC for the needful.

Notes

1. For implementing this any level, It is required to identify all of the stakeholders' whose golden inputs are important.
2. Then the questionnaire needs to be designed depending upon key focus areas.
3. A report format based upon the inputs received from the stakeholders shall also be prepared as per the questionnaire, that helps in analyzing the feedbacks in a better way.
4. Feedback should be addressed properly. Actions shall be performed or escalated through proper channel.

Digital Learning Management System (DLMS)

In order to facilitate the students to continue their study in the situation posed by corona virus pandemic, University has developed its own 'Digital Learning Management System' to provide the students a platform to access their study material, e-resources and enable them to interact with faculty members through live classes and discussion forums.

Soon after the declaration of complete shut-down of University campus due to COVID-19 pandemic, it was a big challenge before the University to continue the study of students. It was the time, when Digital Cell initiated the process to develop University's own DLMS to continue the teaching learning process in the online mode. DLMS was developed in a short span of time and was launched on 31st March 2020 for adoption by students and teachers of the University. Later, it was upgraded with the facility of live classes, attendance compilation and online test facility also to fulfill all the requirements of teaching-learning process.

The salient features of DLMS are:

- ✓ Easy to use interface for students and teachers

1. Faculty Information Management System (FIMS)

In Sep 2019, Faculty Information Management System (FIMS) was launched to capture all details related to academic and research profile of the teachers of the university, which can be used for NAAC/NBA related tasks. At present, research profile of all the faculty members, activities conducted by each department and the cells/sections have been successfully uploaded on FIMS. Digital Cell of the University is responsible for maintaining and updating the FIMS as per the requirements of the University and various accreditation bodies like NBA, NAAC etc.

The salient features of FIMS are:

- ✓ Easy to use interface for faculty members
- ✓ Interface to enter faculty related information like profile, FDPs, STCs, research projects, consultancy, books authored, publications in journals, attended conferences etc
- ✓ Interface to enter all the activities like FDPs, STCs, Conferences, expert lectures etc related to the departments.
- ✓ Provision to enter different activities related to the cells in the University.
- ✓ Provision to submit and view Student Welfare activities by Dean Student Welfare.
- ✓ Provision for administrative control by Internal Quality Assurance Cell (IQAC).

2. Establishment of Digital Classrooms and Digital Notice Boards

With a view to promote use of digital and flipped teaching methodologies, the University has established 13 Digital classrooms in various departments to replace conventional white boards used for teaching. NPIU-MHRD invited proposal to provide infrastructure, particularly Digital Interactive Boards to TEQIP-II as well as TEQIP-III institutions of the country through project funds (over and above the present allocation) to promote flipped or blended learning through digital pedagogy in technical education. The University is the only state university that has been selected through a challenge method based on the predefined criteria covering digital initiatives undertaken by the university and the NBA accreditation status in the university.

At present, 13 Digital classrooms have been setup in the University, the training session of which was held on 13th January 2020 by NPIU. The vice chancellor Prof. Dinesh Kumar formally inaugurated these Digital Classrooms on the occasion in the presence of faculty members of the university. Embedded with modern day technologies, such interactive classrooms offer a friendly environment to the students where they may clear all their concepts while having endless fun. This initiative will not only change the perspective of students towards studying but will also help the teachers in preparing dynamic multi-media lessons which can be interesting for students. 90% of the faculty members have also been trained on Digital Pedagogies and Digital teaching-learning in March & April-2020 by IIT Bombay on SWAYAM platform for adopting digital means of teaching

University has also taken a massive move towards a digitally powered campus. The Digital India Cell of the University has installed Digital Notice Boards and smart TVs in nine prominent locations in the campus during November 2019. The facility is provided under Rashtriya Uchcharat Shiksha Abhiyan (RUSA) scheme. The new facility would not only reduce paperwork but also provide instant information and updates to the students. Digital boards are connected through a centralized server system that enables to update notices anywhere in the campus and these can also be operated location-wise. The idea of a digital notice board enables to display the information in a sophisticated manner and reduces the burden of paperwork.
